👤 PROFILE

Passionate about designing and developing web, server, database, and cloud solutions. My skills in problem solving, team work, and working under pressure, combined with my experience in education and business operations, enable me to excel in all stages of development, from design to deployment and maintenance. I have a diverse skill set with range of technologies. I am comfortable working independently or as part of a team. I am well-versed in the latest development tools and agile development methodologies, such as Scrum.

📁 PROFESSIONAL EXPERIENCE
